## Maximizing your resources

In order to take full advantage of the performance of your new machine, it must be operated skillfully. Allow WEINIG's Training expertise to prepare you and your employees to optimize the use of this new technology.

Our trainers are experienced professionals. You can be sure that in our training courses you will be provided with valuable practical knowledge that is available only through us. Professional training has clear advantages: More efficient operation, higher productivity, and lower costs. The operator's trained hand ensures accuracy from the outset.

10 years WEINIG experience

**Richard Ruf**  
Window machines  
30 years WEINIG experience

**Klaus Knörzer**  
Moulders / Software  
35 years WEINIG experience

## Taking ideas home

Consider this: Doesn't it make sense to have training courses where the machines are actually built? You are sure to take home many ideas that will have potential in your operation. Tours of the factory offer you a look behind the scenes. You will gain hands-on experience with new techniques that can also benefit your plant. Everyone learns something new through this opportunity to exchange ideas with others.

## Immediate productivity from the start

Only effective training puts you on the fast track toward maximum utilization of the machine. The WEINIG Training Center is equipped with machinery used exclusively for that purpose. Plan your success. The training program, with numerous courses and dates, is designed so that each course builds upon another. In addition to the machine and software courses, we also offer highly specialized training such as Moulder Technology, Tool Technology and Production Organization. We also endeavor to be especially responsive to your requests with individual workshops to address your specific needs.
